

Science Networks

4th Nov 2021 - Primary Science Updates and Science Capital

Ensure that you are up to date with what is new in the primary science world by coming along to our network meetings. In this session we will also look at how we can increase the science capital of the teachers and children in our schools. With a few tweaks to existing planning, you can ensure that children know about how scientists link in with the units they are already teaching.

24th Feb 2022- Assessing Primary Science

There is a lot of support for assessing primary science and it can often be overwhelming, in this session we will make sure that we have time to reflect upon your current assessment strategies and how to integrate new ideas.

19th May 2022 Making sure that Primary Science is practical and outside

In this session we will have time to discuss what is working well in your schools and sharing good practice. We will go through the demands of the working scientifically strand and how to ensure that children have opportunities to develop their independent skills whilst working as a group. There is an increasing interest in taking science outside and we will look at resources and activities that can support you to do this.

I'm Sarah Eames and I will be leading your network meetings; I am very happy to speak to new science leaders and support existing science leaders within the group. If you have any questions/suggestions or would like other areas covering please do email me and we will try and add them in.

Cost: Free to members, £25 per delegate for non-members
